Profile Summary

Java Full Stack Developer with hands-on experience in a live CRM-based enterprise application. Skilled in **Java, Spring Boot, React, Redux, JavaScript, HTML, CSS, and MySQL**. Experienced in **REST API** development, **JWT-based authentication, bug fixing, feature enhancements, and database operations** across frontend and backend. Strong understanding of **OOP principles, MVC architecture, and full stack development workflows**. Seeking an **entry-level Java Full Stack Developer** role in a growth-oriented organization.

Technical Skills

- **Languages:** Core Java, JavaScript.
- **Frontend Technologies:** React JS, Redux, Bootstrap, HTML, CSS, SASS.
- **Backend Technologies:** Spring, Spring Boot.
- **Database:** MySQL.
- **Concepts & Tools:** OOP, RESTful APIs, MVC Architecture, JWT Authentication, Bug Fixing

Experience

Java Full Stack Developer | CRM Application | Voyage Software Technologies

Duration: 2 Months

- I have 2 months of hands-on experience working on a real-time, live CRM-based web application as a Java Full Stack Developer. I was involved in both frontend and backend development, using Java, Spring Boot, React, and MySQL
- On the backend, I worked with Spring Boot to develop and enhance RESTful APIs, handled business logic implementation, and performed database operations using MySQL. I actively participated in debugging and fixing production-level issues, improving application stability and performance.
- On the frontend, I worked with React to implement UI changes, integrate APIs, and fix UI-related bugs to improve user experience. I collaborated with the team to understand requirements, analyze issues, and deliver solutions within given timelines.
- Overall, this experience helped me gain strong exposure to real-world application development, bug fixing in live projects, and full stack development workflows.

Projects

E-Commerce Website

- Built a responsive Full-stack Cake Web application using React js, Spring Boot, MySQL, and JWT-based Authentication.
- Implemented secure user authentication & role-based access control using Spring Security and JWT, enabling admin/user- specific functionalities.
- Created RESTful APIs for product listing, order management, user registration, login submission using Spring Boot.

Certifications

- Completed **Java Full Stack Development** course at **Besant Technologies** and gaining expertise in **Java, Spring Boot, React JS, MySQL**.
